Scottish Paediatric Epilepsy Network (SPEN)

Pathway 1: First Seizure

Advice to be given on the following topics:

Please note that this pathway does not cover typical febrile seizures . For any presentations with typical febrile seizures please follow this RCPCH endorsed guidance: http://www.nottingham.ac.uk/paediatric-guideline/postseizureguideline.pdf

Publication Date: November 2017 Revision Date: November 2020 This pathway is not intended to be construed or to serve as a standard of care. Standards of care are determined on the basis of all clinical data available for an individual case and are subject to change as scientific knowledge and technology advance and patterns of care evolve. Adherence to the pathway will not ensure a successful outcome in every case, nor should it be construed as including all proper methods of care or excluding other acceptable methods of care aimed at the same results. The ultimate judgement must be made by the appropriate healthcare professional(s) responsible decisions regarding a particular clinical procedure or treatment plan. This judgement should only be arrived at following discussion of the options with the patient, covering the diagnostic and treatment choices available. It is advised, however, that significant departures from the national pathway or any local guidance derived from it should be fully documented in the patient's case notes at the time the relevant decision is taken.
